

# OPERATING INSTRUCTIONS

## Analog chronograph with 30-minute counter and date

3. Push button B to restart; chronograph hands catch up with ongoing event.
4. Repeat steps 2 and 3 to take any additional split times.
5. Push button A to stop chronograph.
6. Push button B to reset chronograph hands.

### Setting the time:

1. Pull crown out to position 3. Watch will stop.
2. Turn crown in either direction to move hands to correct time.
3. Push crown back into position 1.

### Setting the date:

1. Pull crown out to position 2.
2. Turn crown clockwise to set the correct date.

**IMPORTANT:** Never correct date between 9pm and 3am when automatic calendar changes are in progress; doing so could damage the mechanism.

3. Push crown back into position 1.

### Chronograph functions:

NOTE: After 2 hours of continuous running, the chronograph stops and resets automatically to save battery.

### Measuring cumulative times:

To measure the combined time of a series of shorter events:

1. Push button A to start chronograph.
2. Push button A to stop chronograph and read elapsed time.
3. Push button A to resume measurement.
4. Repeat steps 2 and 3 to add each interval of time.

NOTE: Each time you stop chronograph, chronograph hands will indicate total accumulated time.

5. After final time reading, push button B to reset chronograph hands.

### Measuring split times:

To take intermediate time readings as an event progresses:

1. Push button A to start timing.
2. Push button B to stop chronograph hands and read split time.

NOTE: Chronograph continues to run in background.
