# USING YOUR WATCH

CONTENTS

STEP 1: GET STARTED

On your phone, download and install the Wear OS by Google™ app from the App Store℠ or Google Play Store.

Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries. App Store is a service mark of Apple Inc. Google Play, Google Play logo, and Wear OS by Google are trademarks of Google Inc.
STEP 2: CHARGE

Plug included charger into USB wall charger. Place watch on charger by aligning the 2 magnetic pins on the back of the watch to the pins on the charger. WARNING: To avoid damage to your watch, only use with included charger.

STEP 3: POWER ON

To turn on your watch, press and hold the crown (on the right-hand side of the watch) for a few seconds. It will take up to a few minutes for your watch to start up.

Once turned on, tap the screen to begin and select a language.

STEP 4: CONNECT

Open the Wear OS by Google app on your phone. If you don't have Bluetooth turned on for your phone, the app will instruct you to turn it on.

Then follow the instructions on your phone to pair with your watch. Tap on the code that matches the one on the watch and confirm pairing.

A confirmation message on your watch will be displayed once it is paired. This can take a few minutes, please be patient.

Follow the onscreen instructions on the Wear OS by Google app on your phone to complete the initial setup.

To use Google Assistant and access the Play Store, a Google account must be added to your watch. This can be done during the initial setup or at any time through the Wear OS by Google app.

Should moisture accumulate on the backside, the device may not properly engage the lock screen if one has been set up. Excessive moisture on the front may reduce touch screen functionality. At any time use a clean, soft cloth to dry it thoroughly.
